Unified Voice Messaging System

Introduction:

The Panasonic KX-NS1000 and KX-NS700 has a built in unified voice messaging system. Unified voice messaging functionality can also be added to the KX-TDA/KX-TDE/KX-NCP by adding a KX-TVM50/200. The procedure below details how to access mailboxes in the unified messaging system.

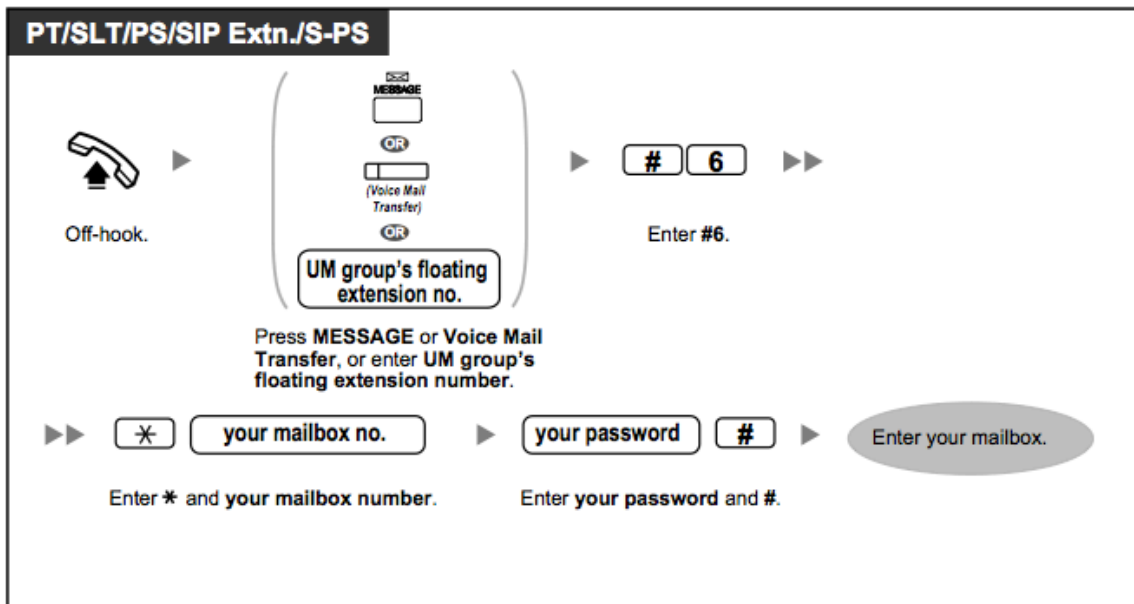

Accessing Mailboxes:

Access your mailbox:

Note: The default UM group floating extension no. is 500.

Access another mailbox:

Note: The default UM group floating extension no. is 500.
